

Arwin V

Unreal Engine C++ Developer
| Game Programmer
VR Developer |

PROFILE :

[Portfolio Link](#)

[Youtube Link](#)

Game Programmer

transitioning from a career in physical architectural design to engineering virtual combat systems and interactive logic. **Fluent in Unreal Engine 5 and C++**, leveraging entrepreneurial experience to **drive teamwork**, lead technical execution, and deliver polished, system-heavy mechanics on time.

LANGUAGES :

- Native Tamil
- English
- **Japanese** - N4 Level
- **Chinese** (Mandarin) - HSK 2 level

CONTACT ME :

📍 Ambattur, Chennai,
India

EDUCATION :

2016 - 2021

RAJALAKSHMI SCHOOL OF ARCHITECTURE

- **B.Arch**

2025

BRIDGE INSTITUTE OF TECHNOLOGY

- **AWS Cloud Solution Architect and Network Engineer**

2025 - Present

MONOLITH INSTITUTE OF RESEARCH AND TECHNOLOGY

- **Masters Certificate in AR and VR**

WORK EXPERIENCE :

2020

- **Internship at ACCESS Architects - Mumbai.**
- **Internship at ISRA Architects - Chennai.**

2022

- **Junior Architect at Midori Architects - Chennai.**

2023

- **Started Interior Design Studio.**

Directed end-to-end 3D pipelines, leading teams of 10+ personnel. Bridged technical execution with strategic marketing, community engagement, and UX to drive brand visibility and studio growth.

TEACHING EXPERIENCE (2 YEARS) :

- **Architectural 3D Instruction:** Led training workshops for architecture students, teaching 3D modeling and visualization pipelines (Rhino, SketchUp, Lumion, Adobe CS).
- **Basics of Programming and Game Dev**

UNREAL ENGINE 5 SKILLS

- **Gameplay & Core Engineering:** C++, Blueprint Interoperability, Custom Attribute Systems (GAS Framework Logic), Memory Management, and Systems Debugging.
- **Combat & AI Architecture:** Modular Combat Systems, Token-Based Enemy Management, Behavior Trees & EQS (Spatial Queries for Cover, Teleportation, and Strafing), Melee/Ranged AI Archetypes, Multi-Phase Boss Behavior Trees, 3D Steering Behaviors with Sensor-Based Obstacle Avoidance, and Aerial Combat AI.
- **XR & Spatial Computing:** VR/MR Interaction Mechanics, HMD Integration, and Stereoscopic Performance Optimization.
- **Procedural Animation Logic:** Control Rig (Procedural IK), Code-Driven State Machines, Blendspaces, and Motion Warping.
- **Engine Systems & World Data:** Procedural Content Generation (PCG) Frameworks, World Partition, and Level Streaming Logic.
- **Runtime Audio & VFX Implementation:** Data-Driven Niagara VFX Logic and MetaSounds Audio Engineering.
- **Network & Multiplayer Architecture:** Client-Server Logic, RPCs, and Local Multiplayer Implementations.

LANGUAGES & DEVELOPMENT PIPELINE

- **Programming Languages:** C++, Assembly 6502 (*Retro Hardware/Low-Level Architecture*).
- **Engineering & IDEs:** Visual Studio, JetBrains Rider, Unreal Insights (*Performance Profiling*).
- **QA & Version Control:** Unreal Automation Testing Framework (*C++ Unit/Functional Testing*), Git, Diversion.
- **Project Management:** Notion, Agile/Scrum & Kanban Frameworks.
